BEYOND CELIAC:
CATALYST FOR
A CURE BY 2030

Currently, the only treatment for celiac disease is the gluten-free diet. A cure to Beyond Celiac means real treatment options so those with celiac disease can eat without fear.

20% OF KIDS WITH CELIAC DISEASE
are not healing on the gluten-free diet.

Celiac disease can lead to anemia, infertility, malnutrition, osteoporosis, and certain cancers.

44% WITH CELIAC DISEASE
are 'glutened' each month.

As self-reported by those with celiac disease.

SCIENTIFIC STRATEGY

- **EVIDENCE GENERATION**
  - Collect, analyze and share data on the burden of celiac disease to make a compelling case for additional funding from government agencies, pharmaceutical companies, biotech and more.

- **TRANSLATIONAL RESEARCH**
  - Directly fund promising new research that translates quickly and bridges scientific investigation to clinical use to speed up development of celiac disease treatments.

- **CLINICAL TRIALS**
  - Actively recruit for celiac disease clinical trials and work with pharmaceutical companies to ensure trials are designed with the patient perspective in mind.

- **DRUG REPURPOSING**
  - Invest significant resources to identify treatments researched for other purposes that might also benefit celiac disease patients.

KEYS TO SUCCESS

- **Diversified funding** pools resources from a broad range of sources to invest in opportunities with the highest potential.

- **Targeted advocacy** amplifies the patient voice, soliciting public funds into policies supporting treatment development and equitable access.

- **Strategic partnerships** advance priorities, aid in overcoming challenges and maximize progress.

**OUR SCIENCE TEAM**

- SALVATORE ALESCI, MD, PHD
  - Chief Scientist and Strategy Officer

- KATE AVERY, MPH
  - Director of Research & Patient Engagement

- AMY RATNER
  - Director of Scientific Affairs

- KEN KILGORE, PHD, MBA
  - Chief Scientific Investment Officer
