ABOUT US

At least 1% of the world's population suffers from celiac disease, **a serious, genetic, autoimmune condition**. Up to 83% of those with celiac disease may be undiagnosed or misdiagnosed. Studies show that after two years on the gluten-free diet, many adults still experience intestinal damage and up to 30% of adults with celiac disease continue to have symptoms. Undiagnosed celiac disease can lead to serious conditions such as anemia, brain damage, and fertility and **even certain cancers**. Those lucky enough to get diagnosed face a strict, lifelong gluten-free diet because there are currently **no pharmaceutical therapies**.

Beyond Celiac is laser-focused on accelerating treatments toward a cure because the gluten-free diet is burdensome and ineffective, and our community needs solutions. To us, a cure means real treatment options.

With your help, we are driving innovation toward the day our community can eat without fear by advancing breakthroughs in prevention, diagnosis, treatment and care.

BEYOND CELIAC UNITES WITH PATIENTS AND PARTNERS TO DRIVE DIAGNOSIS, ADVANCE RESEARCH AND ACCELERATE THE DISCOVERY OF NEW TREATMENTS AND A CURE.

\$250

INDIVIDUAL TICKET

A CURE FOR

LANDON

"It has been heartbreaking to watch someone I love dearly struggle with celiac disease. It hurts that when he's in pain, we can't take it away! All we can do is cuddle and hope it passes as soon as possible. We hope the future will be better for our son."

CHRIS & DECLAN

"I am 11 years old and was diagnosed with celiac disease last year. Right now, there is no cure and the only treatment is following a life-long gluten-free diet. I didn't realize how challenging and stressful this would be, but I do know that I have to do it because gluten damages my body. I want to change this! That's why I am [fundraising] to help raise awareness of celiac disease and funding for research into new treatments and a cure. We can do this together."

KAYLA & SYDNEY, @THECELIACGIRLS

"We both were diagnosed with celiac disease in 2019 when we were in middle school. We wanted more people to be more alert on what exactly celiac disease is and why it is so important. Being able to share our story and contribute to a cause that's shaped so much of our lives has been incredibly meaningful. We hope that by speaking up and stepping forward, we can inspire others to get involved!"

JASMIN

"Food was always a source of comfort and enjoyment for me until my diagnosis, and then it became a source of anxiety. Knowing that any bit of gluten can bring me back to square one of feeling miserable, I became hyperaware and suspicious."

LEAH

"I almost lost my life to celiac disease after being misdiagnosed for nearly my entire life. I'm now 20 years old and received my diagnosis just over a year ago. The challenges that I faced could go on for a lifetime."

WE HOPE WE CAN COUNT ON YOUR SUPPORT!
